# We're GREEN TOO

## Whites/Blacks/Clears

## Browns

## Beiges

## Greens

## Bronzes

## Grays

## Yellows

## Blues

## Reds

Premier Industrial Supply, Inc. is committed to not only excellent products and services, but also the environment. Our XtraBond®9500 Modified Polyurethane Sealant achieves both of these!

The world is changing in its recognition on the effects of construction industry on the environment. There is a genuine increase in the awareness and supply of "green" goods, services, and standards within the construction industry.

Premier is committed to developing our products and standards consistent with the progression of an "eco-friendly" world.

Our "Green" series of sealants & adhesives are beneficial to the effect on the environment at two levels. First, by minimizing the effects of the environment. Secondly, increasing a building's efficiency.

Increasing a building's efficiency is made possible by reducing the amount of heat loss (or intrusion) by sealing cracks, seams, and other openings. The environmental effect reduction is made possible by our extremely low VOC (volatile organic compounds) levels. All of Premier's "Green" products have VOC levels less than that required by the national standards.

Premier has the ability to scientifically color match virtually any color, generate a formula, mix and fill your Custom Color . . . all in the same day too!

\*Custom colors available upon request
